

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 22 1921

	PAGE
BELL, E. T., of Seattle, Wash. Arithmetical paraphrases.....	1
——. Arithmetical paraphrases (continued).....	198
——. On restricted systems of higher indeterminate equations.....	483
DICKSON, L. E., of Chicago, Ill. Determination of all general homogeneous polynomials expressible as determinants with linear elements.	167
DOUGLAS, J., of New York, N. Y. On certain two-point properties of general families of curves.....	289
ETTLINGER, H. J., of Austin, Tex. Oscillation theorems for the real, self-adjoint linear system of the second order.....	136
FITE, W. B., of New York, N. Y. Properties of the solutions of certain functional differential equations.....	311
GLENN, O. E., of Lansdowne, Pa. Author's correction.....	543
GRONWALL, T. H., of New York, N. Y. Differential variations in ballistics, with applications to the qualitative properties of the trajectory...	505
HAZLETT, OLIVE B., of South Hadley, Mass. New proofs of certain finiteness theorems in the theory of modular covariants.....	144
HURWITZ, W. A., of Ithaca, N. Y. An expansion theorem for a system of linear differential equations of the first order.....	526
JACKSON, D., of Minneapolis, Minn. On functions of closest approximation.....	117
——. On the convergence of certain trigonometric and polynomial approximations.....	158
——. Note on a class of polynomials of approximation.....	320
KAKEYA, S., of Tōkyō, Japan. Maximum modulus of some expressions of limited analytic functions.....	489
KEMPNER, A. J., of Urbana, Ill. Polynomials and their residue systems..	240
——. Polynomials and their residue systems (continued).....	267
LEFSCHETZ, S., of Lawrence, Kans. On certain numerical invariants of algebraic varieties with application to Abelian varieties.....	327
——. On certain numerical invariants of algebraic varieties with application to Abelian varieties (continued).....	407
MOORE, R. L., of Austin, Tex. Concerning certain equicontinuous systems of curves.....	41
MORSE, H. M., of Cambridge, Mass. Recurrent geodesics on a surface of negative curvature.....	84
NELSON, A. L., of Ann Arbor, Mich. Pseudo-canonical forms and invariants of systems of partial differential equations.....	180

REYNOLDS, JR., C. N., of Hanover, N. H. On the zeros of solutions of homogeneous linear differential equations.....	220
SHARPE, F. R., and SNYDER, V., of Ithaca, N. Y. The construction of algebraic correspondences between two algebraic curves.....	31
SNYDER, V., and SHARPE, F. R., of Ithaca, N. Y. The construction of algebraic correspondences between two algebraic curves.....	31
WALSH, F. L., of Cambridge, Mass. On the location of the roots of the jacobian of two binary forms, and of the derivative of a rational function.....	101
——. A generalization of the Fourier cosine series.....	230
WEDDERBURN, J. H. M., of Princeton, N. J. On division algebras.....	129
WHITE, H. S., of Poughkeepsie, N. Y. A property of two $(n + 1)$ -gons inscribed in a norm curve in n -space.....	80
WILLIAMS, W. L. G., of Williamsburg, Va. Fundamental systems of formal modular seminvariants of the binary cubic.....	56
